Degree	Institute	CGPA/%	Year
M.Tech. (CSE)	Indian Institute of Technology Guwahati	9.07	2015
B.E. (IT)	Shri Vaishnav Institute of Technology and Science, Indore	69.88	2011
XII	Modi Public School, Kota	73.20	2006
X	Oxford Junior College, Ujjain	88.80	2004

EXPERIENCES

Member of Technical Staff, NetApp Inc.

Jul 2015 –(present)

- Working as Storage Efficiency Developer.
- Managing issues and features related to file and volume clones.

Teaching Assistant, IIT Guwahati

Aug 2013 – May 2015

Worked as a TA for Software Engineering, Computer Graphics and Data Structures Labs.

Assistant Systems Engineer, Tata Consultancy Services Ltd.

Mar 2012 - Jul 2013

- Worked as an iOS Application Developer.
- Developed a Portfolio Analysis Tool for iPhone and iPad.

ACADEMIC PROJECTS

Exploring the Wisdom of Crowds

Feb 2015 – Jun 2015

Dr. Sharad Goel, Stanford University

The “wisdom of crowd” to systematically investigate the “wisdom of crowds” is leveraged in this project. A large online experiment is developed, in which each team creates a module to study the wisdom of the crowd in a specific domain. Tasks corresponding to each module are presented to crowd on online platforms (like Mechanical Turk), and data is collected, which is then analyzed.

Website: <https://wisdomofcrowds.stanford.edu>

Resource Usage Analysis for Speech Recognition Techniques

Jun 2014 - May 2015

Dr. P. K. Das, IIT Guwahati

i-vector, the projection of speech feature into total variability space, reduces the dimensionality of data incredibly. Its impact on real time speaker recognition on devices having low resources like memory, storage space and power is analyzed. These results are then compared with that of GMM-UBM approach and Joint Factor Analysis.

Artificial Immune System Based "Dynamic Obstacle" Avoidance Robot

Feb 2014 - Apr 2014

Dr. S. B. Nair, IIT Guwahati

To make a robot which learns to avoid the "dynamic obstacles" using the principles of "Clonal Selection" technique used in Artificial Immune System. The robot learns to avoid the obstacles using the concept of "Reinforcement Learning".

Robot Cooperation Through Stigmergic Communication

Jan 2014 - Feb 2014

Dr. S. B. Nair, IIT Guwahati

To enable the robots to perform sequential tasks by cooperating with each other via stigmergic communication. Mobile Agents are used for implementing stigmergy and to make the system decentralized.

HMM based Word Recognition System

Sep 2013 - Nov 2013

Dr. P. K. Das, IIT Guwahati

To make a system which will take a spoken word as input at runtime and output the recognized word on screen in real time. The spoken word must belong to a predefined set of words.
